9. ☐ Other _____.

DETAILED ACTION

1. This is in response to the Applicant's arguments and amendments filed on June 05, 2007 in which claims 1 and 7 have been amended and claim 6 has been canceled. Claims 1-5, and 7-18 are currently pending.

Allowable Subject Matter

2. After a further search and thorough examination of the present application and in view of the applicant's arguments, and amendments, claims 1-5 and 7-18, renumbered as 1-17, are found to be in condition of allowance.

3. The following is an examiner's statement of reasons for allowance: the cited prior arts teach WLAN having a bus interface for connection to the host or computer, and the WLAN also includes a physical layer circuit consisting of MAC for controlling medium access, RF for transmitting digital data over an appropriate frequency band, and the BBP interposing the MAC and the RF in order to provide a WLAN system capable of easily limiting the range of communications for network services. The prior arts further teach DSP provides an interrupt to the external host processor to request that the host processor communicates data between memory and host processor.

On the other hand, the Applicant teaches the VPN module comprises: an input buffer for inputting and storing the data packets transmitted from the host; and an output buffer for processing the data packets stored in the input buffer in one of a VPN and a WLAN algorithm and transmitting the processed data packets to the host. The Applicant further teaches transmitting the data packets read from the hybrid

network device to an Internet protocol (IP) stack through a signal process for the VPN in a VPN processor if the data packet read from the VPN module, or transmitting the data packet directly to the IP stack if the data packet is the data packet read from the WLAN module. These limitations, in conjunction with all limitations of the independent claims, have not been disclosed, taught, or made obvious over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jean A. Gelin whose telephone number is (571) 272-7842. The examiner can normally be reached on 9:30 AM to 7:00 PM.
